Day 1 Weather Hazards

Valid: 0800 Tue - 0800 Wed

Locally heavy rain
with isolated flash
flooding
in NM, especially in/near
burn scar locations

Strong storms
w/heavy rain and
Possible flash flooding

-  Very Common – Happens Often
-  Common – Happens Frequently
-  Uncommon – A Few Times a Year
-  Rare – Once Every 1-5 Years
-  Very Rare – Once Every 5-10 Years

*Threat levels are based on FEMA
Region 6 criteria. State or local
threat level criteria may differ.

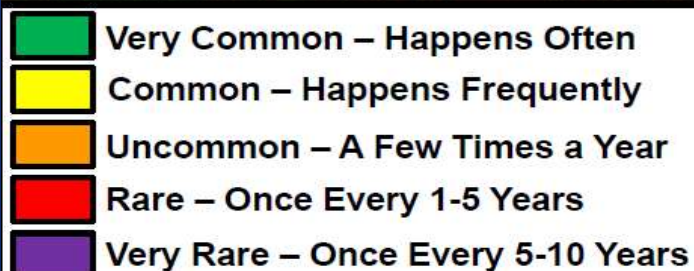

Hazardous Weather

Day 2-3 Weather Hazards

Valid: 0800 Wed - 0800 Fri

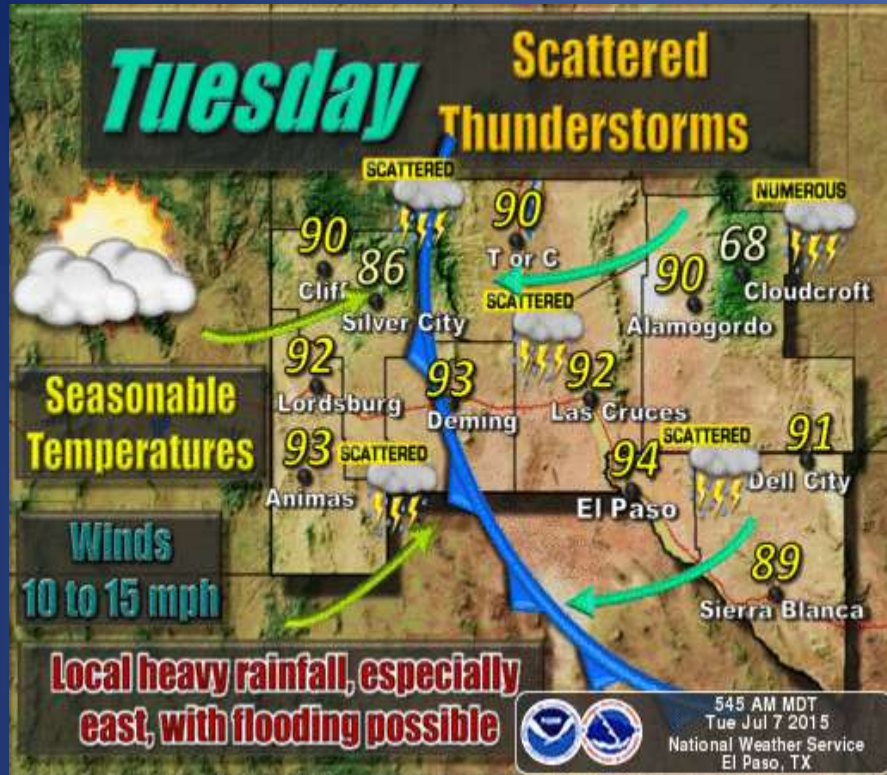

Areas of flash flooding
possible Wednesday
especially in/near
burn scar locations

Flash flooding
possible
Wednesday

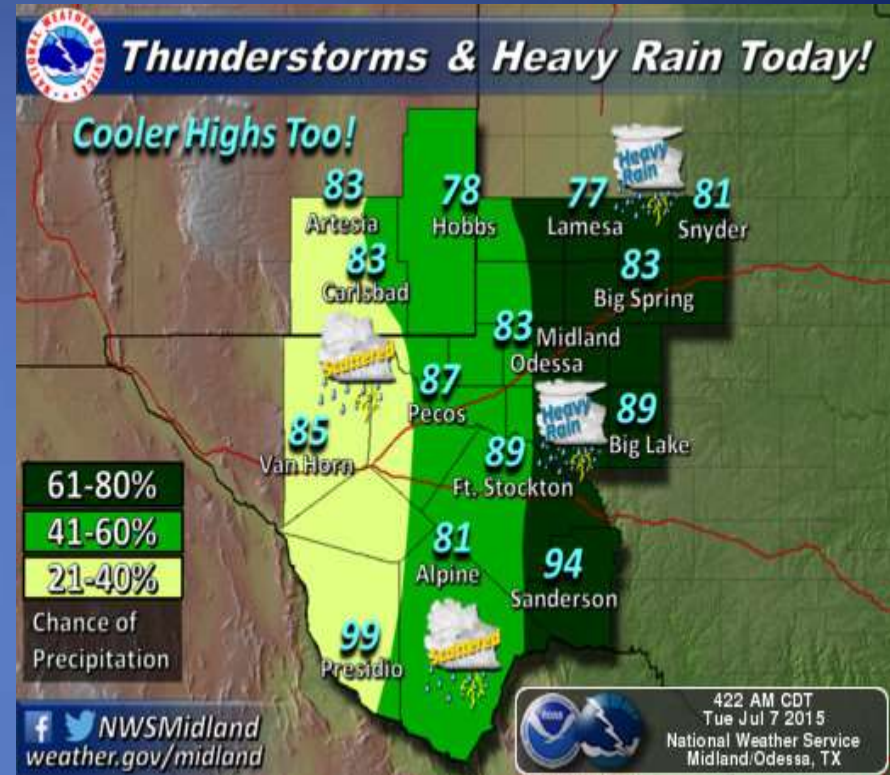

*Threat levels are based on FEMA Region 6 criteria. State or local threat level criteria may differ.

Hazardous Weather

Low level moisture and instability will persist on Tuesday. Scattered showers and thunderstorms will develop early afternoon and last into the evening. A weak cold front will move west to about the Continental Divide Tuesday afternoon. This may help focus additional thunderstorms along and just east of the front. Temperatures will remain at seasonal levels.

Hazardous Weather

Rain Tonight

Scattered showers and thunderstorms will develop tonight.

Main Hazards:

Dangerous Lightning

Localized flash flooding, especially in urban areas.

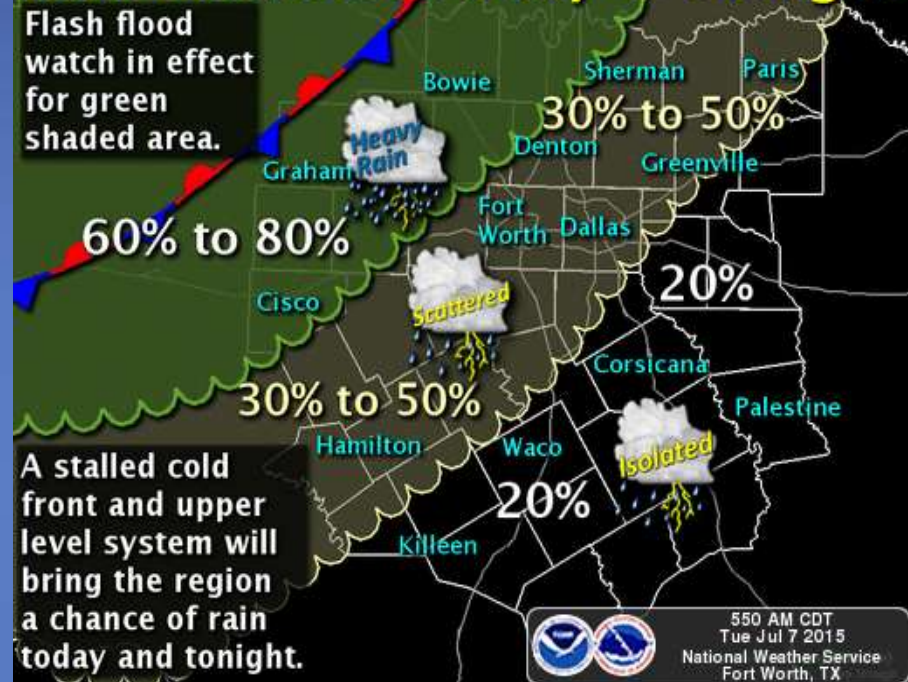

National Weather Service
San Angelo, TX
Updated: Jul 07 4:03AM

Scattered showers and thunderstorms are expected tonight. The main hazards will be dangerous lightning and localized flash flooding.

Rain Chances Today & Tonight

Flash flood watch in effect for green shaded area.

A stalled cold front and upper level system will bring the region a chance of rain today and tonight.

550 AM CDT
Tue Jul 7 2015
National Weather Service
Fort Worth, TX

There will be a chance of rain today and tonight across the area with the best chances occurring across the northwestern parts of the region where a cold front will become stationary. There is the potential for slow moving heavy thunderstorms along and near the cold front through Wednesday morning and a flash flood watch has been issued for the counties northwest of the DFW Metroplex. Elsewhere, farther away from the front, rain chances will be much lower with just isolated to scattered showers and storms are possible.

Hazardous Weather

Isolated to scattered showers and thunderstorms are possible over parts of the Southern Edwards Plateau and northern Hill Country for much of today and northeastern parts of South Central Texas this afternoon. High pressure should still be in control over most of South Central Texas. Breezy southeast winds of 10 to 20 mph will accompany high temperatures in the upper 80s to middle 90s.

Weather Warning/Advisories Issued

| DATE | WARNING TYPE | LOCATION |
|----------|---|--|
| 07/06/15 | Significant Weather Advisory | Andrews, Archer, Armstrong, Baylor, Briscoe, Carson, Collingsworth, Cottle, Crosby, Deaf Smith, Dickens, Donley, Floyd, Foard, Garza, Gray, Hale, Hardeman, Hemphill, Kent, King, Knox, Lubbock, Lynn, Martin, Motley, Oldham, Potter, Randall, Roberts, Stonewall, Swisher, Terry, Wheeler and Wilbarger Counties |
